

# vacompact

vacuum-packed waste-processing

**New: vacompact front loader packs and disinfects up to 40 Liter waste volume by vacuum process.**

**Innovative – up to 50% volume reduced - odorless - save - antibacterial**

**Easy handling and fast procedure:**

With the convenient pull forward the front loader vacompact is integrated easily into any bar, kitchen counter, or in the kitchen of smaller yachts. **Compact and small as a dishwasher**, the high-performance packaging device can be retrofitted in your yacht.

**Quick in use:** Connection to the electricity grid with 220 V or any other voltage. Regardless of costly connections to water and wastewater.

## Waste packaging for sail- und motor-yachts

### Technical details

Material	VA-steel
Waste volume reduction	up to 50%
Connected load	230 V – 50 Hz – 1KW
Security	EN 60204 – VDE 0113
Noise emission	62 dB
Control	SPS
Safety category	IP 54

### vacompact front 40, integrable

Dimensions	
Waste volume per vacuum process	40 liter
Weight	65 Kg
Width	560 mm
Height	720 mm
Depth	490 mm
